As an agency, LUK builds great partnerships, and relies on these partners to provide excellent services throughout the community. Our internal relationships are absolutely vital to the health of the organization. Our Behavioral Health Services component works closely with all the other LUK components. The Urban Youth Collaborative Serious infants work closely with BEI, our therapeutic, experiential learning program. Foster Care and Behavioral Health Services work closely to put our annual Day in the Park event in Worcester. Two other programs highlight our commitment to partnerships. Families and Communities Together is a collaborative effort with Community HealthCare, providing families support and care coordination for youth who have a Serious Emotional Disturbance. The family is at the center of the planning process and builds a team around their vision for their child’s future. The Central Community Health Partnership is a collaboration between LUK, Inc., AdCare, Open Sky Community Services, Women’s Alternatives and the Bridge and Senior Community Services, and was launched in July 2018, after nearly a year of preparation. These organizations provide Behavioral Health and Long-term Support Services through the MassHealth program.

A Voice Found
For the past year, one of LUK’s Intensive Care Coordinators (ICC) and a Family Partner worked with a mom of two young children. She was struggling and experiencing difficulties at home. Her mom was leaving on a tour of duty in school. Having had challenging experiences before, mom was very tired and overwhelmed. Through her unit social at the base hospital, mom, who was an ICC, LUK was able to connect mom to counselors who understood her family’s situation. LUK staff strengthened our communication with the ICC and the family, giving the resources she was able to access the help of the ICC and Family Partner, moms around transportation, stability, and, wonderful education for her children. “We helped them find their voice (as a family).”
