Glossary of Terms

Grantseeking Terms - Overview	
FINANCES	
Balance Sheet	A financial document that shows an organization's financial condition (assets, liabilities and net worth) on a particular day.
Fiscal Agent	A nonprofit organization that will legally hold money for a group that does not have 501(c)(3) status (federal determination.)
Statement of Activities	A financial document listing an organization's income, expenses and changes in net assets for a specific period of time.
Statement of Functional Expenses	A financial document that divides expenses by management and administration, fund-raising and program costs.
Statement of Income and Expense	See statement of activities.
PROPOSAL NARRATIVE	
Activity	The specific step(s) taken within each objective that meets your goal. For the drinking and driving organization example (see Goal), one activity for your media campaign objective may be to write editorials to the local newspaper.
Goal	The overall, broad purpose(s) of a project or organization. For example, if your organization works to end drinking and driving, one of your goals may be to raise public awareness of the dangers of drinking and driving.
Objective	The way(s) in which you will meet your goal(s). For the drinking and driving organization example (see Goal), one objective to meet your goal of raising public awareness may be to conduct a media campaign.
TYPES OF GRANTS	
Capital Grant	A grant that is generally for endowment, building, equipment, or construction. (Building and construction grants are often called "bricks & mortar" grants.)
Endowment Grant	A grant to be invested in perpetuity for ongoing operations of an organization.
General Operating Grant	An unrestricted grant for the everyday operations of an organization.
Program/Project Grant	A grant that is generally for a specific activity or plan within the overall organization, usually time-limited.
Start-Up Grant	A grant to cover the costs of starting a new project or organization.
Technical Assistance Grant	A grant to support a nonprofit's organizational development or infrastructure needs.
Grant Writing Terms	
Abstract (aka Executive Summary)	An abstract is a very <u>brief</u> summary (less than one page) of the project for which you are seeking funding. This should be well written, comprehensive, and brief because it is all some people will read, especially private funding agencies. An abstract is usually written after the proposal has been developed.
Amendment	Term for revised and resubmitted application as a result of service, resources and/or funding amount changes (i.e. cost-of-living-adjustments)
Application	Some granting agencies require that you complete their application forms in order to apply for their funding. While you may submit additional information, e.g., a School Improvement Plan, it is likely that only the information contained on the application pages will be read.

Rudgot	A project budget is the part of the proposal that describes in detail
Budget	how you propose spending the funds you are requesting from the
	funding agency.
Budget Justification	Narrative providing details on the use of and need for costs
Budget Justification	presented in an itemized budget.
Budget Narrative	A budget narrative provides a "narrative" description of each line item
Baaget Harrative	in the budget and the basis for the figure that is presented in the
	budget. For example, "The salary category includes funds for a full-
	time classroom teacher and half-time resource teacher estimated at
	\$20 per hour for the 10 month project period (1600 hours for the
	classroom teacher and 800 hours for the resource teacher)."
Budget Period	The intervals of time into which a multi-year period of assistance is
	divided for budgetary and funding purposes. Budget periods are
	usually 12-months long but may be shorter or longer, if appropriate.
Circular A-21	Cost Principles for Educational Institutions (U.S. Office of
	Management and Budget)
Circular A-110	Uniform Administrative Requirements for Grants and Other
	Agreements with Institutions of Higher Education, Hospitals and
	Other Non-Profit Organizations (U.S. Office of Management and
0: 1 4 400	Budget)
Circular A-122	Cost Principles for Non-Profit Organizations (U.S. Office of
Compatitive Crants	Management and Budget) Grant programs in which grantees are selected by a competitive or
Competitive Grants	, , ,
Consortium	comparative review of proposals. (See Entitlement Grants) See Sub-Contract.
Consultant	Individual hired to give professional advice or services for a fee,
Consultant	normally never an employee of the hiring institution. Strict guidelines
	apply.
Contracts	Agreements whereby the sponsor defines and supports clearly
	defined activities.
	defined activities.
Cooperative Agreement Cost Reimbursement	
Cooperative Agreement	defined activities. Grant-Contract hybrid. Funder is involved in programmatic decisions. A contract where the provider is paid by the expanses accrued at a pre-agreed upon amount per line item.
Cooperative Agreement	defined activities. Grant-Contract hybrid. Funder is involved in programmatic decisions. A contract where the provider is paid by the expanses accrued at a pre-agreed upon amount per line item. Institutional partnership with funding agency in the support of the
Cooperative Agreement Cost Reimbursement	defined activities. Grant-Contract hybrid. Funder is involved in programmatic decisions. A contract where the provider is paid by the expanses accrued at a pre-agreed upon amount per line item. Institutional partnership with funding agency in the support of the services. This is usually eligibility rather than a review criterion.
Cooperative Agreement Cost Reimbursement Cost Sharing	defined activities. Grant-Contract hybrid. Funder is involved in programmatic decisions. A contract where the provider is paid by the expanses accrued at a pre-agreed upon amount per line item. Institutional partnership with funding agency in the support of the services. This is usually eligibility rather than a review criterion. Institutional funds used are commonly known as "matching funds".
Cooperative Agreement Cost Reimbursement	defined activities. Grant-Contract hybrid. Funder is involved in programmatic decisions. A contract where the provider is paid by the expanses accrued at a pre-agreed upon amount per line item. Institutional partnership with funding agency in the support of the services. This is usually eligibility rather than a review criterion. Institutional funds used are commonly known as "matching funds". A product that the funder expects to receive as part of the contract
Cooperative Agreement Cost Reimbursement Cost Sharing Deliverable	defined activities. Grant-Contract hybrid. Funder is involved in programmatic decisions. A contract where the provider is paid by the expanses accrued at a pre-agreed upon amount per line item. Institutional partnership with funding agency in the support of the services. This is usually eligibility rather than a review criterion. Institutional funds used are commonly known as "matching funds". A product that the funder expects to receive as part of the contract expectations. (e.g., curriculum, survey, etc.)
Cooperative Agreement Cost Reimbursement Cost Sharing	defined activities. Grant-Contract hybrid. Funder is involved in programmatic decisions. A contract where the provider is paid by the expanses accrued at a pre-agreed upon amount per line item. Institutional partnership with funding agency in the support of the services. This is usually eligibility rather than a review criterion. Institutional funds used are commonly known as "matching funds". A product that the funder expects to receive as part of the contract expectations. (e.g., curriculum, survey, etc.) Those costs related to the actual conduct of a research project
Cooperative Agreement Cost Reimbursement Cost Sharing Deliverable	defined activities. Grant-Contract hybrid. Funder is involved in programmatic decisions. A contract where the provider is paid by the expanses accrued at a pre-agreed upon amount per line item. Institutional partnership with funding agency in the support of the services. This is usually eligibility rather than a review criterion. Institutional funds used are commonly known as "matching funds". A product that the funder expects to receive as part of the contract expectations. (e.g., curriculum, survey, etc.) Those costs related to the actual conduct of a research project (salaries, fringe benefits, consultants, equipment, supplies, travel,

Minimally, it should include your evaluation objectives in measurable terms, data collection and analysis procedures, reporting schedules, timelines and budget sections.

From a so all and A so 4k a sold a se	Foderal reliev/see DUC Creat Delive Ot to see
Expanded Authorities	Federal policy (see PHS Grant Policy Statement;
	http://grants.nih.gov/grants/policy/gps/8postnew.htm) giving greater
	autonomy to grantees, including the ability to carry over funds from
F&A	one budget period to the next. Facilities and Administration Costs (see Indirect Costs).
Federal Funding	Funds which are provided through a branch of the federal
rederal runding	, o
Flow Through Funding	government. Funding which originates from the federal government, but which is
1 low Tillough Lunding	"flowed through" a state agency. Some funds of this type are
	distributed as entitlement grants (e.g. Chapter I) and other funds as
	competitive grants (e.g. Serve America). In some cases the states
	are given the freedom to establish their own distribution criteria, but
	not always. This can also be flow through funding at a municipal level
	(e.g., Community Development Block Grant – CDBG).
Formative Evaluation	Formative evaluations are used to determine the current status of a
	project and improve its implementation, i.e., "How are we doing?"
	This type of evaluation provides for ongoing monitoring of the project.
	(See Summative Evaluation)
General Administration and	See Indirect Costs.
Operating - GAO	
Gift	General support with minimal restrictions on use. Progress and
	financial reports not usually required. Usually a private source of
0 1 -	funding.
Goals	Goals are general statements of what the program intends to
Grant	accomplish or the intended effects of a project. Support for a specific project designed by the funds recipient.
Grant	Sponsor has expectations about how the funds are spent.
	Deliverables may include formal project reports. Financial reports are
	required.
Grant Cycle	The time period from the start of the grant (program start) to the
	completion (usually determined by the funder often in alignment with
	the funder's fiscal year.) Federal usually runs from October 1 to
	September 30. State from July 1 to June 30 (Some Department of
	Education can run from September 1 to June 30 or August 31).
	Private funders vary based on award cycles.
Grant Mechanism	General purpose of a grant program and guidelines for submitting
	proposals and managing awarded grants.
Indirect Costs	Those costs related to institutional infrastructure, both physical and
	administrative, that are necessary for the services to be conducted
	(space, utilities, custodial services, security, library services,
	information systems, shared administrative facilities, institutional
	review board, payroll, accounting, human resources, liability
	insurance, executive staff, administrative staff, purchasing, grant management). These costs are not usually itemized in grant
	applications. Typically, indirect costs are calculated as a percentage
	of all or part of the direct costs. See Direct Costs. This is usually a
	predetermined percentage of the direct program costs that is
	established by the finance department of the organization or funding
	source.
iPDF	Interactive PDF. Type of PDF allowing for form filling on screen. Full
	capabilities (calculations, saving) require full Adobe Acrobat program
	(e.g. version 4.0; not just reader).
IRB	Institutional Review Board. Oversees all research involving human
	subjects.
IRG	Initial Review Group (aka Study Section). Conducts first stage of
	grant peer review; second stage is by the "Council".

Just-in-Time	A series of measures aimed at streamlining the federal grant
Just-III- I IIIIe	application and review process. In general, certain kinds of
	information (e.g. Other Support) are required at time of a grant award
	rather than at the time of application submission.
Key Staff	Primary staff responsible for the delivery and oversight of the
	program and services presented in the application.
Logic Model	In general Logic Models summarize the logical connections among
	the needs that are the focus of the project, project goals and
	objectives, the target population, project inputs (resources), the
	proposed activities/processes/outputs directed toward the target
	population, the expected short- and long-term outcomes the initiative
	is designed to achieve, and the evaluation plan for measuring the
Management Plan	extent to which proposed processes and outcomes actually occur. Proposals should include a management plan that explains how the
Management Flan	project will be managed. This should include a detailed list of
	activities to be accomplished, a description of the staff to be involved
	in implementing the activities, their qualifications, and a timeline for
	completing the activities.
Matching Funds	See Cost Sharing.
Maximum Obligation	Often called Max Ob. A maximum dollar amount that a contractor is
	approved to provide by the funder. Usually a "ceiling" on the amount
	of service to be contracted is predetermined as part of a unit rate
Management I.	contract.
Measurable	Measurable objectives typically have five components: Audience,
Objectives	<u>B</u> ehavior, <u>C</u> onditions, and <u>D</u> ata, and <u>E</u> ra (time) for observing the behavior. All objectives should be written so that an outside evaluator
	can determine if the objectives of your project have been achieved.
	(Usually, this would rule out direct observation as events occur.)
Mini-Grant	Mini-grants are usually for small amounts of money (\$200-\$1,000)
	and do not have as many requirements as other grants.
Modular Grant	Streamlined NIH format for grant applications requesting less than
	\$250,000 per year. Intent is to restrict IRG review to scientific aspects
	of applications.
Needs Assessment	A needs assessment explains why the program you are proposing is
	needed. The statement of need should be substantiated by "hard"
	data. Funding agencies normally do not accept "personal opinions" or other anecdotal information as evidence of why a project is needed.
Non-competing	Refers to applications that do not undergo competitive peer review.
14011-00111petting	Commonly used to refer to "Non-competing continuation" applications
	(aka Progress Reports) requesting funds for next budget period in a
	multi-year grant. PHS 2590 form is used.
Outcome Objectives	Outcomes describe the results or consequences that are anticipated
	because of the intervention or program you propose. Projects
	intended to have an effect on a target population (usually students or
	teachers) should have outcome objectives. (See Process Objectives.)
Overhead	See Indirect Costs.
PA	Program Announcement. PAs usually have an indefinite longevity,
	have no funds set aside and usually use standard grant application deadlines.
Paylino	Percentile rank-based funding cutoff point determined at the
Payline	beginning of the fiscal year by balancing the projected number of
	applications with the amount of funds available.
PDF	Portable Document Format. Common format for electronic transfer
- 	and web posting of text and graphics. Requires Adobe Reader
	program to view.

Door Povious	Deview teams of applications for even set assessed of individuals
Peer Review	Review teams of applications for support composed of individuals
	from the provider community (as opposed to review by federal
Daniel Bank	employees).
Percentile Rank	Based on priority score, the application's rank relative to others
	reviewed by its IRG at the same and past two review meetings. An
	application's percentile rank often is the main indicator of merit and
Drievity Coore	basis for determining whether it gets an award.
Priority Score	Average score a proposal receives from the IRG. This is the primary determinant of success. Range is 100 to 300 (lower is better) if 50%
Drogram Announcement	of applications are triaged to a "Not Scored" group. See PA.
Program Announcement Progress Report	
Project Period	See Non-Competing. The total time stated in the grant notification (including any
Project Period	amendments) for which support is requested. The period may consist
	of one or more budget periods. It does usually not constitute a
Preliminary Proposal	commitment by the funding source to fund the entire period. Some granting agencies require that you submit a brief 2-5 page
i ieiiiiiiaiy Fioposai	concept paper, sometimes called a preliminary proposal. A
	Preliminary proposal briefly describes the project you would like to
	submit. If the agency approves of the concept, you will be invited to
	submit a full proposal or complete their application.
Private Funding	Funds, which are provided through a private agency, corporation or
1 Trace I allaling	foundation. Usually private agencies have already identified priority
	areas (topics and/or regions) in which they would like to see projects
	implemented.
Process Objectives	Process objectives describe <u>how</u> a project will accomplish its goals.
	They are usually appropriate in developmental projects or as interim
	project objectives. The purpose of process objectives is to assess
	how well an activity was implemented, and how the implementation
	can be improved. They can be written in a measurable format. (See
	Outcome Objectives.)
Proposal	A proposal is a document that describes, in detail, the type of project
•	you would like a funding agency to sponsor.
Protective Factors	Protective factors are any factors that act to modify risk, either by
	directly reducing a disorder or dysfunction or by moderating the
	relationship among risk factors and problems or disorders, often
	called buffering effects (Lou et al. 2008; Fraser, Richman & Galinsky,
	1999). Protective factors can also be understood as the positive
	influences that reduce the effects of stressful life events on people,
	increase their ability to make good decisions, and promote the social
	and emotional competence that will help them thrive now and in the
	future.
Rank	See Percentile Rank.
Rebudgeting	Making changes to proposed expenditures for different budget
	categories (e.g. decreasing budget for Supplies and increasing
	budget for Travel). For federal funding, such changes are usually
	permissible under "Expanded Authorities". Use rebudgeting form.
Request for Applications	See RFA.
Request for Proposals	See RFP.
Request for Qualifications	See RFQ.
RFA	Request for Applications. RFAs are usually one time solicitations for
	grant applications, have funds set aside, and have special application
252	deadlines.
RFP	Request for Proposals. Often used synonymously with RFA.

RFQ	Request for Qualifications. Usually intended for open order contracts where an agency is qualified to provide a service without a commitment from the funder for a minimum or maximum number of service units.
Small Business Grants	Funding mechanisms used by federal agencies to encourage research and development in the private sector.
Sub-Contract	Arrangement whereby a different organization, legal entity or individual provider carries out part of a project.
Sustainability Plan	A plan for sustainability that details how the proposed project approach will create project self-sufficiency and help to ensure that the impact of the project will continue after funding has ended.
State Funding	Funds which are provided through a branch of the State government.
Summative Evaluation	Summative evaluations are used to determine the impact of a project, i.e., "How did we do? or What were our results?" This type of evaluation measures the effectiveness of achieving the project objectives. (See Formative Evaluation.)
Technical Assistance (TA)	The provision of expertise and/or support for the purpose of strengthening the capabilities of grantee organizations to deliver services.
Unit Rate	A contract that is purchased by the funder at a per unit cost. (A unit of service could be by the hour, day, deliverable or some other form of measurement.)
Measuring Program C	Outcomes Terms
Inputs	Inputs include resources dedicated to or consumed by the program. Examples are money, staff and staff time, volunteers and volunteer time, facilities, equipment, and supplies. For instance, inputs for a parent education class include the hours of staff time spent designing and delivering the program. Inputs also include constraints on the program, such as laws, regulations, and requirements for receipt of funding.
Activities	Activities are what the program does with the inputs to fulfill its mission. Activities include the strategies, techniques, and types of treatment that comprise the program's service methodology. For instance, sheltering and feeding homeless families are program activities, as are training and counseling homeless adults to help them prepare for and find jobs.
Outputs	Outputs are the direct products of program activities and usually are measured in terms of the volume of work accomplished-for example, the numbers of classes taught, counseling sessions conducted, educational materials distributed, and participants served. Outputs have little inherent value in themselves. They are important because they are intended to lead to a desired benefit for participants or target populations.
Outcomes	Outcomes are benefits or changes for individuals or populations during or after participating in program activities. They are influenced by a program's outputs. Outcomes may relate to behavior, skills, knowledge, attitudes, values, condition, or other attributes. They are what participants know, think, or can do; or how they behave; or what their condition is, that is different following the program.
	For a particular program, there can be various "levels" of outcomes, with initial outcomes leading to longer-term ones. For example, a youth in a mentoring program who receives one-to-one encouragement to improve academic performance may attend school

	more regularly, which can lead to getting better grades, which can
	lead to graduating.
Outcome indicators	Outcome indicators are the specific items of information that track a program's success on outcomes. They describe observable, measurable characteristics or changes that represent achievement of an outcome. For example, a program whose desired outcome is that participants pursue a healthy lifestyle could define "healthy lifestyle" as not smoking; maintaining a recommended weight, blood pressure, and cholesterol level; getting at least two hours of exercise each week; and wearing seat belts consistently. The number and percent of program participants who demonstrate these behaviors then is an
	indicator of how well the program is doing with respect to the
Outoomo torreto	outcome.
Outcome targets	Outcome targets are numerical objectives for a program's level of achievement on its outcomes. After a program has had experience with measuring outcomes, it can use its findings to set targets for the number and percent of participants expected to achieve desired outcomes in the next reporting period. It also can set targets for the amount of change it expects participants to experience.
Benchmarks	Benchmarks are performance data that are used for comparative purposes. A program can use its own data as a baseline benchmark against which to compare future performance. It also can use data from another program as a benchmark. In the latter case, the other program often is chosen because it is exemplary and its data are used as a target to strive for, rather than as a baseline.
Evaluation Terms	
Coverage	The extent to which the program is serving the intended target population.
Empowerment Evaluation	Evaluation that is designed to support program participants and staff in self-evaluation of their own programs (a form of internal evaluation).
Evaluation	Systematic collection and use of program information for multiple purposes, including monitoring, program improvement, outcome assessment, planning, and policy-making.
External Evaluation	Evaluation done by consultants or researchers not working for the same organization as the program.
Formative Evaluation	Evaluation that is designed to collect information that can be used for continuous program improvement.
Impacts	Usually used to refer to long-term program outcomes.
Input	Resources available to the program, including money, staff time, volunteer time, etc.
Internal Evaluation	Evaluation done by staff within the same organizational structure as the program.
Logic Model	A flowchart or graphic display representing the logical connections between program activities and program goals.
Monitoring	A type of evaluation designed to ensure that program activities are being implemented as planned (e.g., the number of participants, number of hours, type of activities, etc).
Output	The immediate products or activities of a program.
Outcome	Ways in which the participants of a prevention program could be expected to change at the conclusion of the program (e.g., increases in knowledge, changes in attitudes or behavior, etc.).
Multivariate Analysis	A statistical term referring to analyses that involve a number of

	peer factors and individual factors both influence alcohol use would
	be called "multivariate".
Participatory Evaluation	Evaluation that involves key stakeholders in the design, data
	collection, and interpretation of evaluation methods.
Process Evaluation	Evaluation that is designed to document what programs actually do: program activities, participants, resources, and other outputs.
Stakeholders	Those persons with an interest in the program and its evaluation
Stakenoiders	
	(e.g., participants, funders, managers, persons not served by the program community members, etc.).
Summative Evaluation	Evaluation that is designed to collect information about whether a
Summative Evaluation	program is effective in creating intended outcomes.
Triangulation	The use of multiple data sources and methods to answer the same
3	research question.
Qualitative Data	Information that is reported in narrative form or which is based on
•	narrative information, such as written descriptions of programs,
	testimonials, open-ended responses to questions, etc.
Quantitative Data	Information that is reported in numerical form, such as test scores,
—	number of people attending, drop-out rates, etc.
Federal Budget Terms	
Appropriation	The amount of funding Congress provides for a federal program to
Appropriation	spend in a given year. Legislative language sometimes set the terms
	under which funds may be spent.
Authorization	Legislation that establishes or continues a federal program or
Addionzation	agency, specifies its general goals and conduct, and usually sets a
	ceiling on the amount of money that can be appropriated for it.
	Appropriators may not exceed the amount authorized for a given
	program, but are under no obligation to fully or even partially fund the
	program.
Block Grants	Grants to states that can be used for a variety of purposes. Block
Diook Granto	grants are funded by annual appropriations by Congress and
	allocated to states by formula.
	Block grants usually provide considerable flexibility to states for
	delivering the services outlined in the block grant.
Budget Authority	Authority to enter into obligations that will result in immediate or
-aaget/tamenty	future outlays involving federal funds.
Budget Enforcement Act (BEA)	Passed in 1990, this Act established caps on discretionary spending
	in the three categories of federal spending – defense, domestic and
	international. It also prohibited transfers between these categories.
	The Act expired in 2002, although certain Senate rules related to the
	BEA have been extended through April 15, 2003.
Categorical Grant	An allocation of funds for a particular programmatic purpose.
Capped Entitlement	An entitlement on which an overall annual funding limit is placed and
• •	funding is distributed by formula.
Concurrent Budget Resolution	A budget resolution passed by both Houses of Congress but not
•	signed by the President. The annual budget resolution presents both
	fiscal aggregates such as total budget authority, outlays and deficit,
	and a subdivision of spending by functional category for the year.
	May also include binding instructions on the level of savings each
	committee must produce (see reconciliation).
Congressional Budget Office	A legislative agency that assists Congress in the preparation of the
(CBO)	budget and analyzes budget-related issues. CBO is responsible for
•	estimating the budgetary effects of all spending and revenue bills.
Continuing Resolution	Legislation that extends appropriations for specific ongoing programs
•	when the regular appropriation has not been enacted by the
	beginning of the fiscal year.

B 14	I management and a second control of the control of
Debt	The total accumulated amount if money the federal government has
	borrowed to make up shortfalls in revenue (currently in the trillions of
	dollars). There are three basic measures of the federal debt:
Debt Held by the Public	Federal debt held by all investors outside the federal government,
	including individuals, corporations, state or local governments, the
	Federal Reserve banking system, and foreign governments. When
	the debt held by the Federal Reserve is excluded, the remaining
81/11/11/10	amount is referred to as privately held debt.
Debt Held by Government	Federal debt held by the federal government itself.
Accounts	Most of this debt is held by trust funds, such as Social Security.
Gross Debt	The total amount of outstanding federal debt, whether issued by the
	Treasury or other agencies and held by the public or federal
D 1/0 '''	government accounts.
Debt Ceiling	A statutory limit imposed on the total outstanding federal debt. The
	ceiling can be raised or lowered through an act of Congress.
Deficit	The amount by which the government's spending exceeds its
	revenues in a single fiscal year.
Unified Deficit	The most commonly used measure of the federal deficit. It includes
Endand Foods C. III	all federal spending and all federal revenues.
Federal Funds Ceiling	A measure of the federal deficit that excludes the spending and
	revenue totals of federal government trust funds such as Social
D't'	Security.
Discretionary Programs	Programs funded by annual congressional appropriations bills,
	except for "appropriated entitlements" such as veterans'
	compensation. Under the Budget Enforcement Act, these
Discoution and Organization Con-	expenditures are capped.
Discretionary Spending Cap	Limits placed on the total amount of budget authority and outlays for
Entitlement	discretionary programs Congress can provide in a given fiscal year.
Entitlement	Program mandating the payment of benefits to any person meeting
	eligibility requirements established by statute. The amount spent is not controlled by annual congressional appropriations. Entitlement
	programs include Social Security, Medicare and Medicaid.
Fiscal Year	The federal government's accounting period, which begins October 1
i iscai Teai	and ends September 30. Massachusetts state government runs from
	July 1 to June 30. Private agencies vary but usually run in alignment
	with the state, federal or calendar year.
Gross Domestic Product (GDP)	The value of all finished goods and services produced in a country
Gross Bomestio Freduct (GBF)	during a given period. GDP serves as the principal measure of the
	size of a country's economy.
Mandatory Spending	Federal spending on entitlement programs and interest on the
	national debt. Mandatory spending accounts for approximately two-
	thirds of all federal spending.
Outlay	Payment actually made by the federal government. This differs from
-	budget authority in that it reflects money the federal government
	actually spends, not the amount that has been appropriated by
	Congress. Many times in a given year outlays are often less than the
	budget authority granted by
	Congress.
Pay-As-You-Go (a.k.a.: Pay-Go)	A provision of the now-expired Budget Enforcement Act of 1990.
, , , , , , , , , , , , , , , , , , , ,	Pay-Go required that any entitlement or tax proposal include
	provisions for financing. Raising new revenue or cutting existing
	entitlement programs must pay for new entitlements or changes to
	the tax code. Thus, under the Pay-Go provision of the BEA changes
	in entitlement programs or revenues had to be deficit neutral.
Reconciliation	The process used by Congress to amend tax and entitlement
	programs to meet the instructions in the budget resolution regarding

	outlay and revenue targets. Reconciliation legislation has served recently as the primary vehicle for deficit reduction measures.
Rescission	A statutory midyear reduction or cancellation in previously appropriated funds. The President submits a rescission request to Congress, specifying the amount of the cut and estimating the impact. Congress then has 45 days to pass a bill allowing the cut in spending. If Congress does not pass a bill in that period of time, the rescission request is considered refused.
Sequestration	The withholding or cancellation of funds pursuant to the Gramm-Rudman-Hollings Act (the 1985 deficit reduction law). Sequestered funds are permanently canceled.
